

Homeland Security Information Network – Faith Based Organizations (HSIN-FBO)

Collaborating to Protect Our Nation’s Faith Based Organizations (FBO)

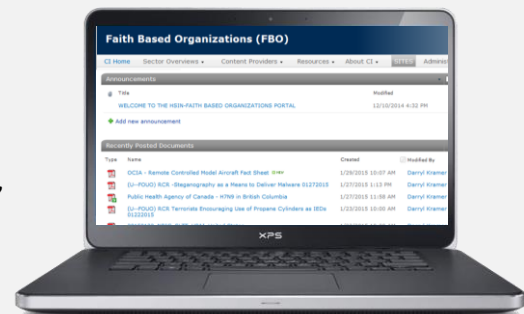

Successful protection of our nation’s FBOs requires coordination and collaboration between FBOs, the Department of Homeland Security (DHS), other Federal agencies and State and Local government. The Homeland Security Information Network – Faith Based Organizations (HSIN-FBO), a community under HSIN-Critical Infrastructure (HSIN-CI), serves as a common platform to provide tactical and planning communication functionality among FBO security, safety, and disaster response partners. HSIN is a secure, unclassified, web-based communications system that serves as the primary, nationwide DHS collaboration system for sharing Sensitive But Unclassified Information.

Through HSIN-FBO Users:

- Gain access to HSIN-FBO and HSIN-CI, the nation’s primary source for Sensitive But Unclassified critical infrastructure protection information
- Maintain a direct, trusted channel with DHS and other vetted security and safety partners
- Communicate information pertaining to threats, vulnerability, security, response and recovery activities affecting faith based and cross sector operations

HSIN Features:

- Enhanced Security and Identity Management through Two-Factor Authentication and Identity Proofing
- Relevant Content such as Infrastructure Protection Alerts, Information Bulletins, Announcements and Analysis
- Situational Updates and Incident Reports

Request Access to HSIN-FBO

To request access to HSIN-FBO, please email your name, employer, work email address and title/position description to hsinci@hq.dhs.gov.

If you need more information regarding HSIN-FBO, please contact HSINCI@hq.dhs.gov.
